ISMAIL KHAN

Front-End Web Developer

👤 Profile

Passionate web developer with a background in accounting. Committed to learning modern web technologies and utilizing best practices. Strong sense of focus towards challenges by facing them head on with deliberate effort. Excellent in client communication and hitting hard deadlines.

📊 Highlighted Projects

Mr. Robot Computer Ecommerce Store

React.js | Sass | Firebase

Built with React and React Router. This ecommerce store utilizes the PayPal API and persists data and user authentication with Firebase. Features include: product display, functional add to cart system with checkout, user login, user dashboard, and admin dashboard.

Hearthstone Card Search Deckbuilder

JavaScript | jQuery | Sass | REST API | HTML5

Built with paired programming, this responsive app utilizes the Hearthstone API. The user can output thousands of cards with filters based on multiple selections using HTML5 and jQuery. Each card is viewable for further card detail. A deck-builder feature provides the user with the option to create an exportable 30 card deck.

Beach Stays Travel Website

HTML5 | JavaScript | jQuery | Sass | Responsive Design | Accessibility

This multi-page PSD conversion is a modern website following best front-end practices. Comes fully responsive and web accessible.
